

MANAGER/DIRECTOR TRANSMISSION DEVELOPMENT

Chesterfield, Missouri or San Francisco, California

About Longview

Longview Infrastructure is a transmission developer backed by Stonepeak Infrastructure, a leading alternative investment manager. Longview develops, constructs, owns, operates and maintains high-voltage electric transmission. It combines proven execution capabilities and sophisticated investment solutions to provide benefits to ratepayers and enable economic growth.

Longview is seeking driven and ambitious professionals ready to embrace new challenges and grow alongside its dynamic team.

What You'll Do

In this role you will spearhead end-to-end project development, including:

- Develop early-stage project proposals including technical optimization, cost estimation, assessment of project economics, and alignment with project objectives
- Navigate complex permitting processes and environmental conditions
- Maintain direct oversight and responsibility for scope, cost, and schedule
- Direct and participate in comprehensive market analysis

Who You Are

- 5+ plus years of experience in managing energy infrastructure projects
- Strong understanding of technical concepts associated with high-voltage infrastructure
- Experience in seeing projects through design, permitting, financing, and construction
- Bachelor's Degree or higher in civil, mechanical, or electrical engineering
- Results-oriented team player with an ownership mindset

What We Offer

- Competitive salary, bonus, and equity participation commensurate with experience
- Excellent health, dental, vision, insurance, 401(k) and generous Paid Time Off
- Opportunity to grow with a company of experienced and dedicated professionals
